

Permit Application Proposed Modifications

- **Eliminate storage of used propane tanks.**
- **Modify onsite truck maneuvering & periodic parking** to add:
no overnight parking of vehicles containing propane or related fuels for storage or delivery.
- **Modify perimeter security fencing:**
 - Max 6 ft height, with option for several strands of barbed wire (with vertical supports, not V-shape)
 - Color of slats dark brown or green (existing color is red, not brown)
 - On north and west side, set fence back from existing Pillar Ridge fence to leave minimum 4 ft space between fences to enable maintenance.
 - Relocate Airport St fence out of right-of-way to improve pedestrian access and provide space for bus stop amenities. Connect directly to Pillar Ridge fence at NE corner to prevent trespass in the gap between fences.
- **No change:** Two cargo containers, 8-ft diameter water tank, and gravel surface in the lot
